

ESB Networks Boggeragh, Ireland

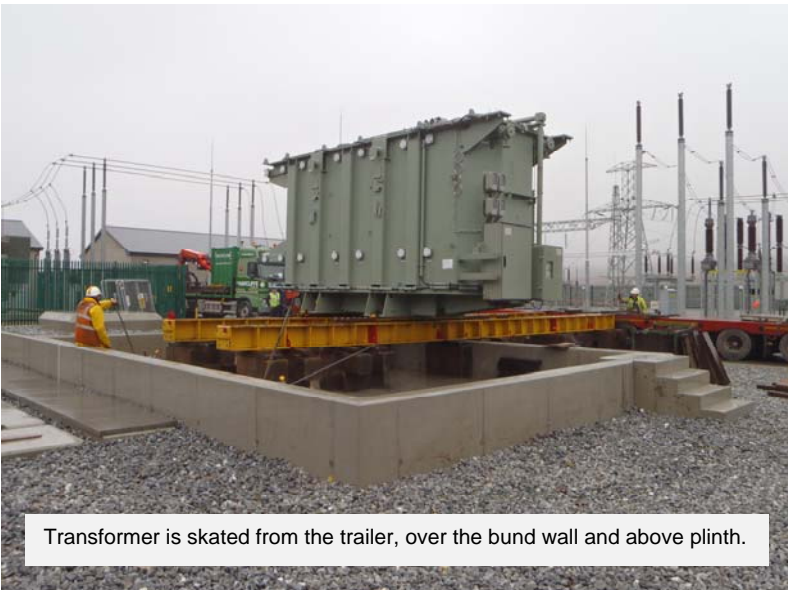

JB Rawcliffe & Sons Ltd. completed the offloading and placement to plinth of a 85,175kg Transformer by jacking and skating.

Site is set up prior to delivery of transformer with a run from the access road within substation.

Transformer is set up for skating from trailer.

Transformer is skated from the trailer, over the bund wall and above plinth.

Transformer is jacked down to the plinth.

Transformer is placed into final position and located on anti-vibration pads.

Location: Boggeragh, Ireland
Project: Offloading & placement to plinth of transformer.
Dimensions: 7000mm x 2380mm x 3680mm, 85,175kg.
Challenge: Wind farm substation.
Equipment: Runway beams, skates, hydraulic jacks.
